#### OSH Infrastructure

##### Scheme

#### OSH authorities and inspection services

Name of the Authority	Health and Safety Executive (HSE)
Link	<a href="http://www.hse.gov.uk/">http://www.hse.gov.uk/</a> <a href="http://www.idea.gov.uk/idk/org/la-data.do">http://www.idea.gov.uk/idk/org/la-data.do</a>

<p>Short abstract</p>	<p>Under the HSW Act, the HSE has been set up in order to support the Government's strategic aims and current targets for health and safety at work. Its main aim is to secure the health, safety and welfare of people at work and protect others from risks to health and safety from work activity. Its mission is to prevent death, injury and ill health to those at work and those affected by work activities.</p> <p>According to the Act, the main statutory duties of the HSE are to propose and set necessary standards for health and safety performance; secure compliance with those standards; carry out research and publish the results and provide an information and advisory service and provide a Minister of the Crown on request with information and expert advice.</p> <p>To perform these duties the HSE seeks to influence people and organisations – duty holders and stakeholders – to embrace high standards of health and safety; promote the benefits of employers and workers working together to manage health and safety sensibly and investigate incidents, enquire into citizens' complaints and enforce the law.</p> <p>HSE is the primary delivery agent for the UK government's Department for Work and Pension's strategic objective of improving health and safety outcomes. The Secretary of State for Work and Pensions has the principal responsibility for the HSE. Certain areas of risk or harm directly or indirectly related to work activity are covered by legislation other than the HSW Act and are not dealt with by HSE. These include disability discrimination, consumer and food safety, fire safety, marine, railway, and aviation safety and most aspects of environmental protection.</p> <p>Local authorities enforce health and safety law mainly in the distribution, retail, office, leisure and catering sectors. HSE liaises closely with local authorities on enforcement matters through the HSE/Local Authorities Enforcement Liaison Committee (HELA). Partnership teams (comprising HSE and local authority staff) and an enforcement liaison officer network in HSE regional offices across Britain also provide advice and support. HELA provides a strategic oversight of the partnership aiming to maximise its effectiveness in improving health and safety outcomes – including enforcement priorities for local authorities. A Local Government Panel, comprising local authority councillors, was also established in 2006 and regularly meets the HSE Board for a strategic dialogue on local, central and devolved government issues that impact on health and safety regulatory functions. It also reviews the effectiveness and performance of the partnership between the two enforcing authorities</p>

▪ **Compensation and Insurance bodies**

Name of the institute	All insurers authorised by the Financial Services Authority (FSA)
Link	<a href="http://www.fsa.gov.uk/">http://www.fsa.gov.uk/</a>
Short abstract	<p>Under the provisions of the Employers' Liability (Compulsory Insurance) Act 1969, most employers are required to insure against liability for injury or disease to their employees arising out of their employment. The Act ensures that employers have at least a minimum level of insurance cover to cover the cost of compensation for employee injuries or illness whether they are caused on or off site (with certain exclusions).</p> <p>Under the law, employers are required to use an authorised insurer. Authorised insurers are individuals or companies working under the terms of the Financial Services and Markets Act 2000. The Financial Services Authority (FSA) maintains a register of authorised insurers. Employers must be insured for at least £5 million. However, the amount of insurance cover depends on risks and liabilities specific to the business/organisation. In practice, most insurers offer cover of at least £10 million. When a policy is taken out or renewed, the insurer provides a certificate of employers' liability insurance. This must state clearly the minimum level of cover provided and the companies covered by the policy. The employer must display a copy of the certificate of insurance where their employees can easily read it.</p> <p>The HSE enforces the law on employers' liability insurance and HSE inspectors can check that an employer has employers' liability insurance with an approved insurer for at least £5 million. The inspectors may also ask to see the certificate of insurance and other insurance details. If an employer does not have suitable insurance they can be fined up to £2500 for any day which they are without insurance. If the certificate of insurance is not display or not made available to HSE inspectors if requested, the employer can be fined up to £1000</p>

▪ **Research institutes**

Name of the institute	Health and Safety Laboratory (HSL)
Link	<a href="http://www.hsl.gov.uk/">http://www.hsl.gov.uk/</a>
Short abstract	HSL, the national institute for occupational safety and health research, was originally set up to minimise risks to people's health and safety at work as HSE's laboratory.

	Today, while continuing to support HSE, HSL now works with a wide range of other public and private-sector organisations, often conducting detailed, bespoke research and development work on their behalf. HSL's primary roles are to provide investigative work and services arising from HSE's day-to-day operation, which often require a rapid multidisciplinary response. HSE maintains a dedicated horizon-scanning team based at HSL to keep the health and safety consequences arising from new trends in science and technology under review. HSL is also a WHO Collaborating Centre in Occupational Health.

Name of the service	International Institute of Risk and Safety Management (IIRSM)
Link	<a href="http://www.iirsm.org/">http://www.iirsm.org/</a>
Short abstract	IIRSM, established in 1975, is a professional membership body that provides recognition, information, support and enhancement for health and safety professionals and specialist members related to the health and safety field. It was created to advance professional standards in accident prevention and occupational health throughout the world. Over the last three decades IIRSM has grown from a collective group of UK health and safety professionals to a thriving International Institute spanning over 70 countries. Its main objective is to advance public education in accident prevention and occupational health in industry. To achieve this, the Institute promotes research into accident prevention and occupational health and publishes the results, encourages individuals to adopt health and safety best practice and help prevent accidents, advises anyone entering the health and safety field to undertake training and obtain professional qualifications and exchanges information with equivalent bodies throughout the world.

Name of the service	British Safety Industry Federation (BSIF)
Link	<a href="http://www.bsif.co.uk/">http://www.bsif.co.uk/</a>

Short abstract	BSIF, set up in 1994, is the UK's leading trade body within the safety industry. BSIF have over 160 members including manufacturers, distributors, test houses, certification bodies, safety professionals and service providers. Their aim is to provide support and guidance on a wide range of occupational safety issues. It aims at helping to both influence legislation and provide industry in general with a source of authoritative information on a range of workplace safety issues, while representing the needs of its members. BSIF is the lead association for the Personal Protective Equipment (PPE) Directive and is recognised as a Competent Authority by the Health & Safety Executive (HSE). The BSIF has active links with many government departments and over 130 representative Trade Bodies.

Name of the service	Chartered Institute of Environmental Health (CIEH)
Link	<a href="http://www.cieh.org/">http://www.cieh.org/</a>
Short abstract	CIEH is a registered charity and the professional voice for environmental health. Its history can be traced back to the 1840s. The CIEH sets standards, accredits courses and qualifications for the education of members and other environmental health practitioners. It provides over 50 certification training programmes which include food safety, health and safety, environmental awareness through a network of over 10,000 registered trainers and 6,000 registered training centres across the UK. It also provides information, evidence and policy advice to local and national government and environmental and public health practitioners in the public and private sectors. As an awarding body, the CIEH provides qualifications, events, and support materials on topics relevant to health, wellbeing and safety to develop workplace skills and best practice.

#### ▪ Standardization Bodies

Name of the Body	The British Standards Institution (BSI)
Link	<a href="http://www.bsigroup.co.uk/">http://www.bsigroup.co.uk/</a>
Short abstract	The British Standards Institution (BSI) is national organization responsible for the development and publication of standards in UK. BSI is a semi-governmental institution with juridical responsibility.

	<p>Since its foundation in 1901 as the world's first standardisation body, BSI has grown into a leading global independent business services organization providing standard-based solutions in more than 140 countries. The BSI develops private, National and International Standards, certifies management systems and products, provides assessment, certification, and testing of products and services, and provides training and information on standards and international trade. BSI developed the first used standard on occupational health and safety management system BS 8800 which went on to become the OHSAS 18000 series standards – the most widely used OSH standard globally. The BSI also developed the first guidance standard on psychosocial risk management in the workplace – PAS1010 .</p>

Name of the Body	The National Examination Board in Occupational Safety and Health (NEBOSH)
Link	<a href="https://www.nebosh.org.uk/">https://www.nebosh.org.uk/</a>
Short abstract	<p>The National Examination Board in Occupational Safety and Health (NEBOSH) was formed in 1979 as an independent examining board and awarding (certification) body with charitable status. It offers a comprehensive range of globally-recognised, vocationally-related qualifications designed to meet the health, safety, environmental and risk management needs of all places of work in both the private and public sectors. Courses leading to NEBOSH qualifications attract around 35,000 candidates annually and are offered by over 500 course providers, with exams taken in over 100 countries around the world. Their qualifications are recognised by the relevant professional membership bodies such as IOSH and IRRSM. NEBOSH examinations and assessments are set by its professionally qualified staff assisted by external examiners; most of whom are Chartered Safety and Health Practitioners operating within industry, the public sector or in enforcement.</p>
